Custom designs

Bring your ceiling to life. Whether you have a bold idea or just a room that needs something, we design and make bespoke rosettes that feel made for your space—because they are.

We work with private clients, restaurants, and hotels to create custom pieces that truly belong in the room. Got an idea? Or no idea at all? Either way, we'd love to hear from you.

Send us an e-mail at enquiries@novafelix.com

Each one of our ceiling roses is cast in white plaster, a material that has been used by artisans for over four thousand years (amazing, right?). Plaster is a safe, durable, fire-resistant and sound-dampening material, which can be easily painted – and repaired, if things don't go to plan.

It is composed of naturally occurring, non-toxic materials including lime, clay, and sand; some of the few things in life that are abundant and renewable. It is also biodegradable, and can be recycled at the end of its life cycle.

The ceiling roses in this collection will become a unique centrepiece to any room, and are crafted with love and hard work in our Oslo studio. Each one can be ordered in custom sizes, and we are always open to custom orders if there's something specific you're after.
